## Citizens for a Planned Economy

We stand for the belief that every American deserves a good job at a fair wage and access to food, health care, and higher education at fair prices.

Citizens for a Planned Economy will fight for the following:

- eliminating unemployment by direct creation of 15 million high-quality jobs
- ending on-the-job discrimination with fair wages determined by a committee of experts
- no wasted capacity or resources
- fair distribution of wealth according to merit<sup>1</sup> and contribution to society<sup>2</sup>
- restoring jobs to blighted regions and cities such as Upstate New York and Detroit, Michigan
- sensible allocation of vehicles, e.g., limiting SUV ownership to those who must drive off road
- five-year plan for transitioning to green technology for electricity generation
- a third term for President Obama so that he can complete the work of protecting the vulnerable from the policies of George W. Bush

Find out how you can make a difference at
